Award # 35 - Kansas 2010

Division IX (Any age) Class 23-1 Backgrounds assorted										
Correct number of buttons: 20										
Correct Size: Any size										
The focus is on backgrounds that usually but not always are mounted in metal and have a separate contrasting material serving as an unimposing visual background for the entire design. Most backgrounds are flat, but may be contour as long as the rim of the mounting encloses the edge of the background material. When mounted in metal, the background material is the "base" material, not other material embellishment. May include some designs under glass (fabric or foil behind cut-out ivory under glass, etc.) Backgrounds half obscured by the designs are acceptable. Buttons with prominent center escutcheon type designs are acceptable if other criteria are met. Buttons with a cut out design, backed by fabric or other material, are also acceptable, as are backgrounds that are sew throughs. Protrusions are not appropriate here.
