Award #9 - Kansas 2010

Division IV Class 10-1 Studs										
Correct number of Studs: 25										
Correct Size: Any size										
Single studs used for fastening with buttonholes and cuffs, vests, ladies shirtwaists and for lapel decoration. The front of the stud is similar to a button in size, shape, design and material. A straight or curved rigid post or rod connects the button-like front to a smaller disk or patented fastener that fits through a buttonhole. *No part moves or comes apart*. There can be movement in the decoration (google eyes, enclosed dice, etc.), but not the construction of the stud.
